

# Vascular Access Training

At Vein Train Ltd we know clinicians want to provide the best care for their patients and we are proud to be part of making this happen by providing high quality affordable training and expertise across the UK.

Utilising decades of experience, evidence-based practice and analysis of what works best for learners, we make learning easy, enjoyable and effective. Clinicians return to their workplace with added confidence and renewed enthusiasm to continue to improve their competence and technique.

Our Director and Lead Trainer, Sarah Phillips, is passionate about the benefits to patients that result from effective training. Sarah leads a team of carefully selected clinicians, each chosen for their specialist experience and knowledge. Vein Trainers are talented at what they do and their enthusiasm is contagious!

## Courses Include

- Venepuncture and Cannulation
- Intravenous Therapy
- Blood Cultures
- Analysing Blood Results
- Bespoke courses

## Some of our Venues:

London: Milton Keynes: Watford:  
Grantham: Peterborough: Nottingham:  
Cambridge: Lincoln: Birmingham: Leeds:  
York: Manchester: Sheffield: Stoke:  
Blackpool: Glasgow: Edinburgh: Ireland:  
Folkestone: Reading: Bristol: Brighton:  
Cardiff: Newcastle: ONSITE.

- **Director - Author and Lead on national standardised training programme for Venepuncture and Cannulation**
- **Lead Trainers who are experts in their field**
- **Quality-focused training to benefit both the learner and the patient**
- **Practical, hands-on training**
- **FREE competency pathway booklet for every learner (50,000 copies in use across the UK)**
- **Excellent value for money without compromising standards**

**Get on the Vein Train and join us in achieving the highest standards possible**

"I founded Vein Train because I believed clinicians wanted to offer their patients high quality care during vascular access interventions and that is still true today. Currently Venepuncture and Cannulation is one of the most common procedures performed in UK hospitals but all too often it is performed sub-optimally. "At Vein Train we know the route to changing this is by offering quality training that is readily accessible. My work in healthcare during the last 20 years has proved to me that these skills are not difficult, but they do need to be taught, learned and practiced if our patients are to receive the best possible care.

"Our team of trainers comprises highly experienced senior nurses, doctors and phlebotomists. We all share a passion for training in all things vein and a talent for passing on practical knowledge. Our evaluations are enlightening and if you share our belief that improvement is not only possible but necessary do join us in making it a reality."
